

New version of the #3200 Pool Lift

In 1997, Handi-Move introduced a Pool Lift with a unique concept onto the market. 14 years later this Pool Lift is still the leader in its field and has been fitted in almost 1500 swimming pools. Even so, we thought it was time to freshen it up and introduce a few improvements, so that the lift continues to satisfy the latest requirements.

The unique concept ultimately remains unchanged so there are only slight changes in the day-to-day use of the lift.

Here is a summary of the main new features

- **New electrical control box**
 - » The new control box is waterproof in accordance with classification IP65.
 - » The box is equipped with a membrane keypad.
- **New electrical hand control**
 - » The pneumatic hand control has been replaced by a waterproof electrical hand control in accordance with classification IP67.
 - » This hand control can therefore be used in the swimming pool without any problems.
 - » It is a variant of the hand control that is used on the current Victor Mobile Lift and Portable Motor.

- **Bracket for the hand control on the handrail**
 - » A special bracket is provided on the handrail for the hand control.
 - » This bracket is marked with a round, yellow disk with Handi-Move logo, a symbol that is also already used on the current Victor Mobile Lift and Portable Motor.
- **New color concept**
 - » The Pool Lift is the third lift, after the Victor Mobile Lift and Portable Motor, which will be finished in the new color concept, grey with yellow trim.
- **Charger**
 - » The Pool Lift charger will no longer be built into the electrical control box and so must now be ordered separately.
 - » The type of charger is identical to the other Handi-Move lifts, except that the plug is IP68 waterproof, a requirement for giving the control box the protection classification (IP65).

The new Pool Lift will be available from mid February 2011 and can be ordered with the following references:

- #3200 0000 0002 : Pool Lift model 2011
- #3200 9030 0001 : charger 220V EUR for Pool Lift
- #3200 9031 0001 : charger 220V UK for Pool Lift
- #3200 9033 0001 : charger 250V AUS for Pool Lift

The following documents will soon be available on the portal

- » User guide
- » Product sheet
- » Repair
- » Yearly inspection
- » SGS test certificate in accordance with EN10535

A very nice commercial video has also been made showing the various possibilities for using the new Pool Lift.

This video can be found on the website and is also available on CD or DVD upon request.
